

Beijing Time Technologies Co., LTD was established in 2001, a new company initiated by TIME Group(1984), and it mainly is engaged in development, production and sale of inverter welders, automatic welding equipments, CNC cutting machines, and arc welding robots. On March 31th, 2006, Beijing TIME was listed on the Shenzhen Stock Exchange through agency share transfer system, which is the first listed company among the welder manufacturing industry in China.

TIME adheres to the key principle “Technology, industry and export are the lifeblood of TIME”. After developing for these years, a set of strict management system for technology, development, products manufacturing, quality control, capital operation, marketing and customer service has been formed. In 1995, TIME Group Inc. acquired ISO 9001 quality system certificate. Later in 2008, the certificates on Environmental Management System (ISO 14001:2004) and Occupation Health Safety Management System (OHSMS 18001:2001) were achieved. TIME Group Inc. became the first corporation in welder manufacturing industry in China who acquired the certificates of above management systems. The technical development center of TIME Group Inc. is the national level technique center. Among the welder enterprises in China, TIME Group Inc. is the first one who sets up the mobile postdoctoral center. There are more than 40 sales men and service subsidiaries, and the sales and after service network is across all over the world.

TIME has engaged in the production of IGBT inverter welders from 1993. By now, there are fifteen series and over one hundred models for all products keeping improved. In 2003, digital DSP technology was adopted in the domestic welding machines; in 2010, TIME robots were firstly shown during Essen Fair; and in 2013, the third generation TD series digital welding machines were launched to the market. The welding equipments from TIME have been widely used in the wind power generation, boiler, pressure vessel, machine manufacturing etc.

In 2009, TIME invested hundreds of millions RMB to build an advanced manufacturing base with yearly production capacity of 300,000 pcs of welding machines in Jinan high-tech development zone. Under the guideline of quality policy “High-tech product, Assuring quality and satisfactory service”, TIME welding equipments have won the compliment of many users and consent of industry experts.

Benefiting from the high technology and strong competitiveness, TIME welding machines were widely used in “Three Gorges Project”, “Olympic Venue Construction 2008” and other key projects; also have been exported to over 40 countries such as Russia, Indonesia, Thailand, Malaysia, Brazil, South Africa, Israel and so on.
