

Essen, 11 May 2021

New date due to the Corona pandemic

INDIA ESSEN WELDING & CUTTING has been rescheduled to 23 to 25 November 2022

In view of the impending uncertainty during these pandemic times, India's leading trade fair for welding and cutting technologies cannot take place this year. The event which was originally scheduled from 8 to 10 September 2021 at Bombay Exhibition Centre in Mumbai, is now scheduled for 23 to 25 November 2022, at the same venue. The postponement affects the complete family of the Indian Metal Fairs that were originally planned for this autumn: INDIA ESSEN WELDING & CUTTING, wire India, Tube India and METEC India.

With this decision, the organizers of the quartet account for their obligations towards their clients and partners of the metal and metallurgy industry sector in India and world-wide. The postponement will ensure that the event will continue to play its leading role in bringing the global industry stakeholders together once again – with the needed planning reliability.

INDIA ESSEN WELDING & CUTTING is the region's leading platform where trade visitors obtain information about products, services and innovations for welding and cutting technologies and place orders directly. In addition, the offer covers diverse welding processes as well as coating, robotics and automation. The fair is organized by Messe Essen, its partner Messe Düsseldorf India as well as the cooperation partner DVS - German Welding Society.
