

Global Security Solutions

FOR OVER 40 YEARS WE HAVE BEEN THE BENCHMARK IN ACTIVE SECURITY AT NATIONAL AND INTERNATIONAL LEVEL.

The active security of goods and people is becoming increasingly important in our daily lives. Having a skilled and experienced partner in the industry is vital to ensure a peaceful and safe life.

Since 1975 the company has worked at national and international level in the field of security by designing, producing and supplying intrusion prevention, fire prevention, video surveillance and access control systems.

Thanks to over 40 years of experience, the company has become the benchmark in residential, business and industrial areas, using cutting-edge technologies and a constantly evolving design and production know-how.

Our products and systems, marked by their “Made in Italy” DNA, stand for reliability and functionality and are the result of careful teamwork aimed at all steps, design, production, supply and after-sales assistance.

TECHNOLOGICAL INNOVATION. WE ARE DEEPLY CONVINCED THAT INNOVATION IS THE FOUNDATION OF TODAY'S AND TOMORROW'S PRODUCTS. INNOVATION AND ITS APPLICATION TO SECURITY ARE THE KEY TO OUR SUCCESS.

Since the very beginning, our internal R&D team has created highly innovative products and such tradition has continued in today's new products.

The cloud e-Connect system for the integrated remote management of intrusion detection and CCTV systems, the NG-TRX bidirectional wireless system and TREDDIX security sensors with 3D analysis are only the latest

examples of a long list of innovations with which we turn into reality our idea of security, making it accessible to everyone.

Many of our products and technologies are patented as we truly believe in our ability to innovate and offer unique solutions to improve simplicity for installers and security for end users.

MADE IN ITALY. WE CONCEIVE, DEVELOP AND PRODUCE OUR OWN PRODUCTS. FEATURING ITALIAN STYLE AND DESIGN.

Made in Italy: three words enshrining the gist of our work and entailing all aspects of our production chain.

A very short chain, enabling us to be flexible and closer to our customers, in constant touch with our users with whom we have established solid relationships and synergies over the years.

The Made in Italy approach lies at the foundation of the whole design phase of a product: planning according to functionality and technological state-of-the-art, attention to each single detail, such as ergonomics and ease of installation and deployment and finally a touch of style and charm which make it unmistakably Italian.

10

INTEGRATED SYSTEMS. WE OFFER SOLUTIONS WHICH INTEGRATE PERFECTLY AND WORK IN SYNERGY.

Our lines (intruder alarms, fire alarms, CCTV and access control) are intertwined and the ease of central management is guaranteed by a unified environment of supervision and configuration.

Moreover, products within the same line are interoperable and may be recombined in countless combinations to create tailor-made systems for specific installation needs.

We believe integration among systems is the key to reaching higher and more complex goals.

EL.MO. can offer connection modes and tools between control units and Building and Home automation systems, guaranteeing top security. As proof of that, over 400 integrations are carried out yearly through EL.MO. products.

**We do not only create security:
we are security**

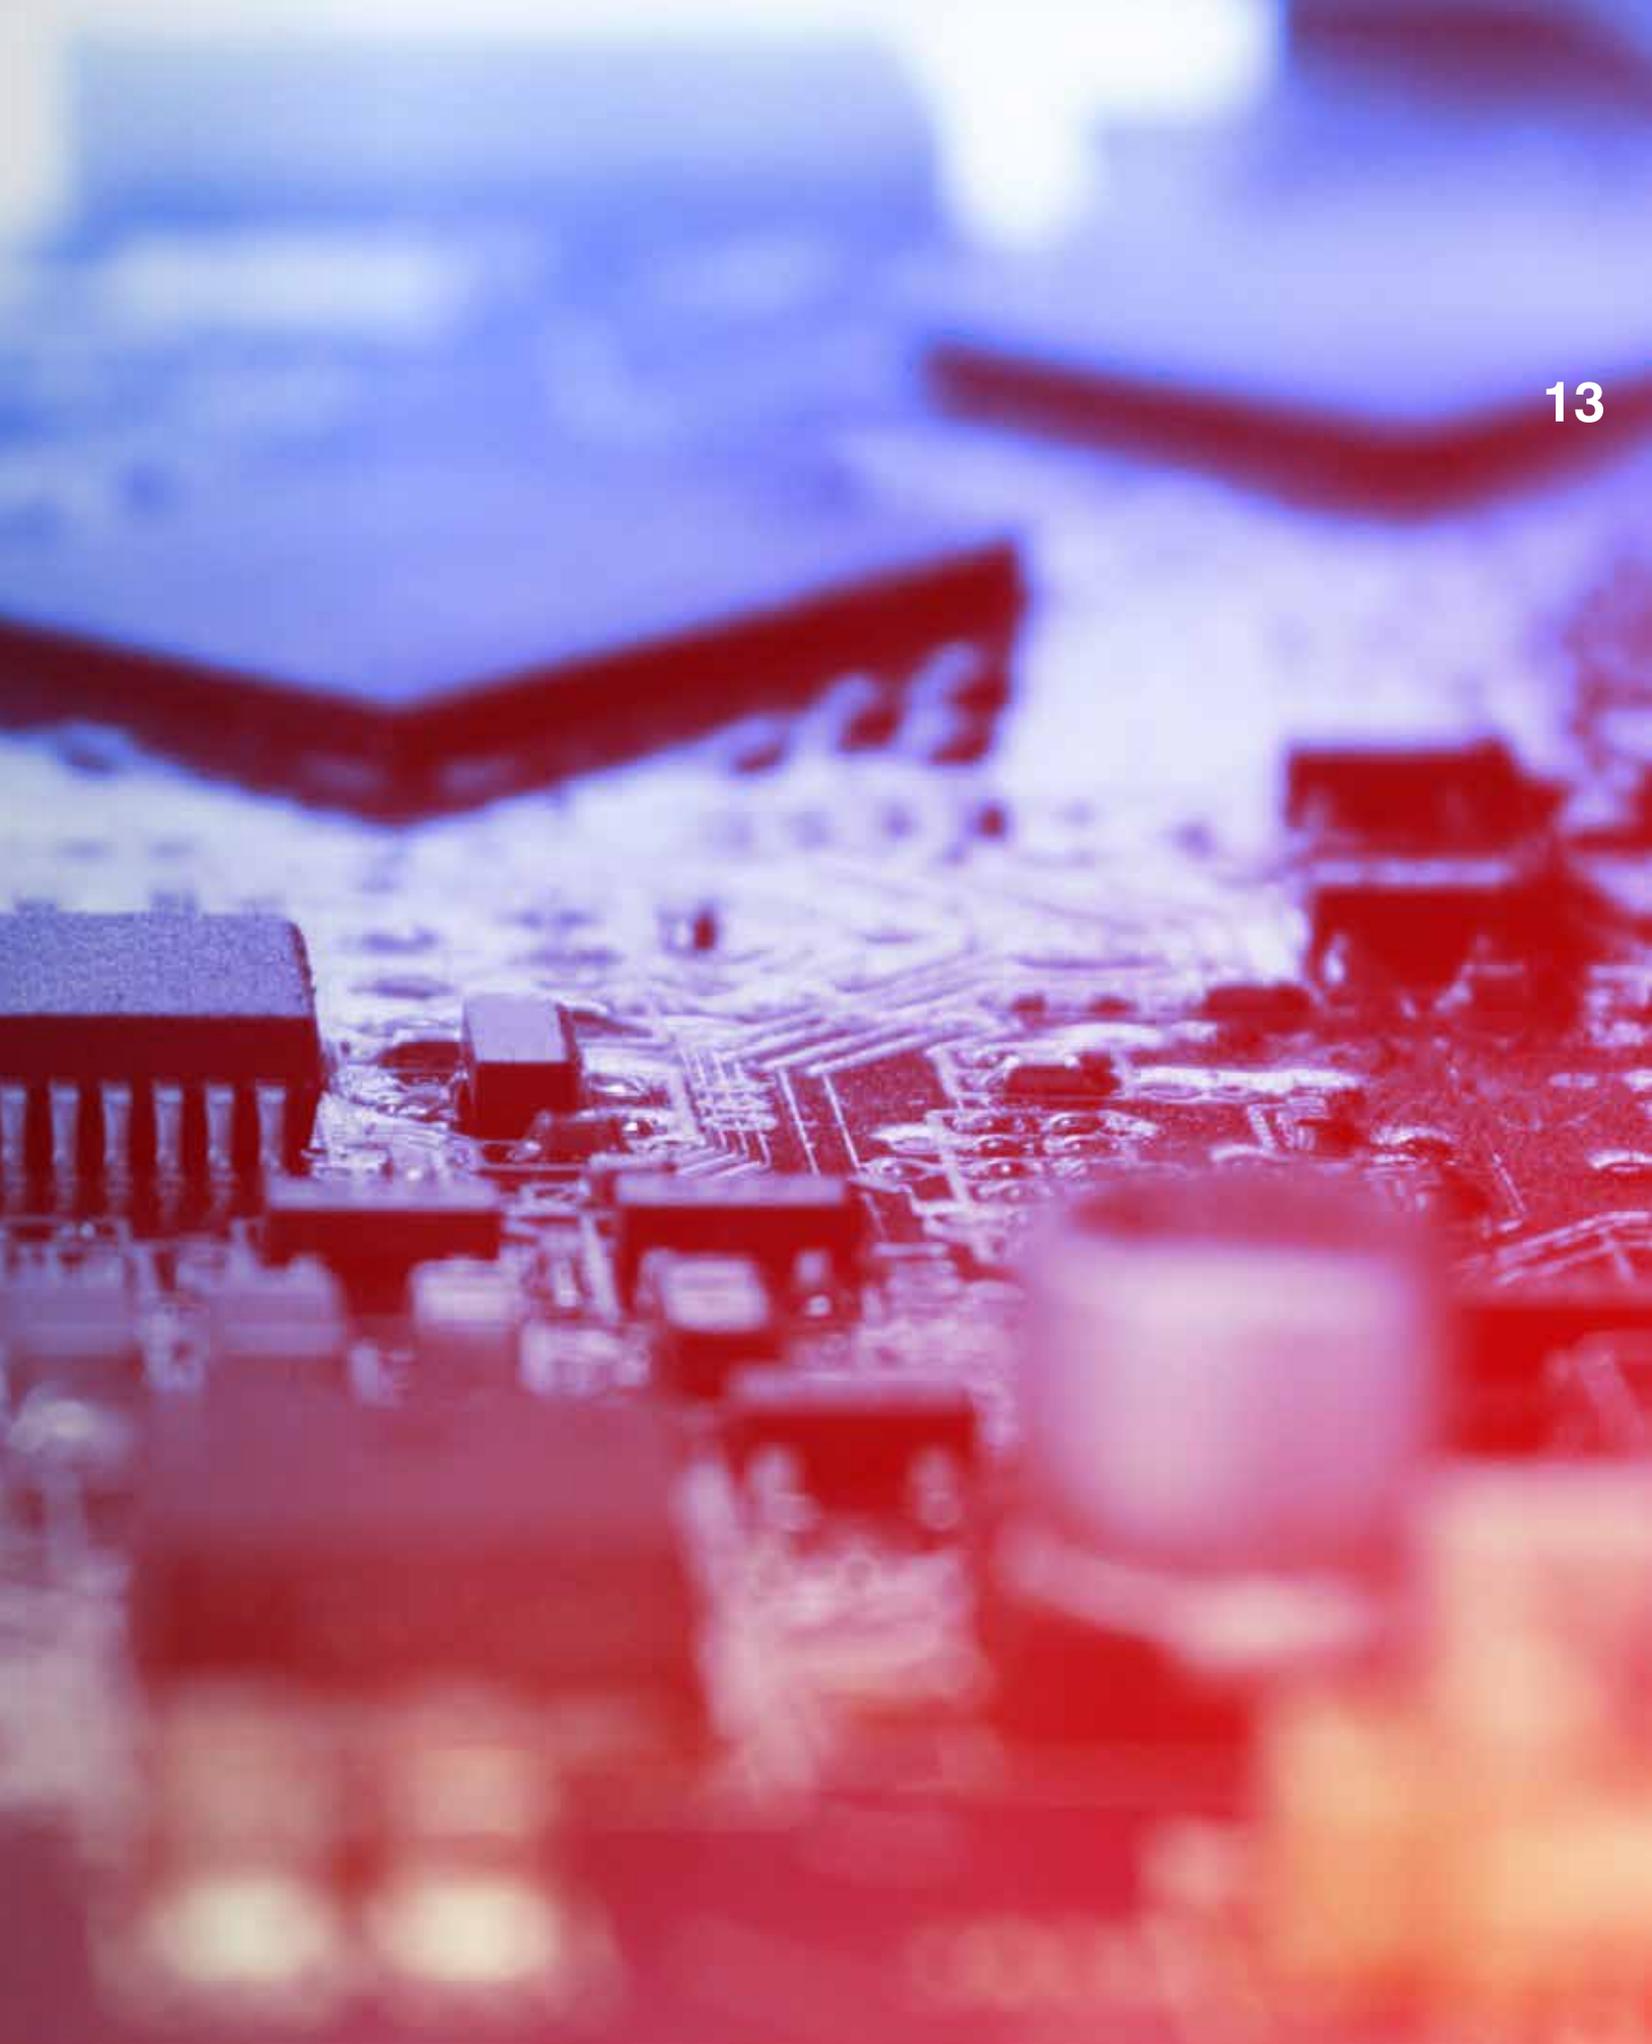

ISO 9001 AND CERTIFICATIONS. CERTIFICATIONS ARE NOT A MERE TARGET, BUT RATHER AN INCENTIVE TO PURSUE THE PATH TO EXCELLENCE: QUALITY.

EL.MO. firmly believes in the quality of its products and its working approach. It boasts specific certifications, awarded by distinguished external bodies.

Specialized technicians in our internal lab run all necessary tests to verify our products' compliance to reference regulations.

Among them, ISO 9001 certification attesting the quality of the whole company system and several EN50131 and CPR 305/2011 EN54 certifications, awarded by the IMQ institute, an internationally recognized certification body.

EXPERTISE. WE ARE ALWAYS ON YOUR SIDE, WITH OUR COMMITMENT AND EXPERTISE IN THE DESIGN AND CHOICE OF PRODUCTS, INSTALLATION, MANAGEMENT AND MAINTENANCE OF THE SYSTEM.

The same care we devote to our products is aimed at the support services, with their high added value.

Our System Design team supports you in the project design phase and can offer proposals for supply specifications, bills of quantities, technical reports and operating diagrams.

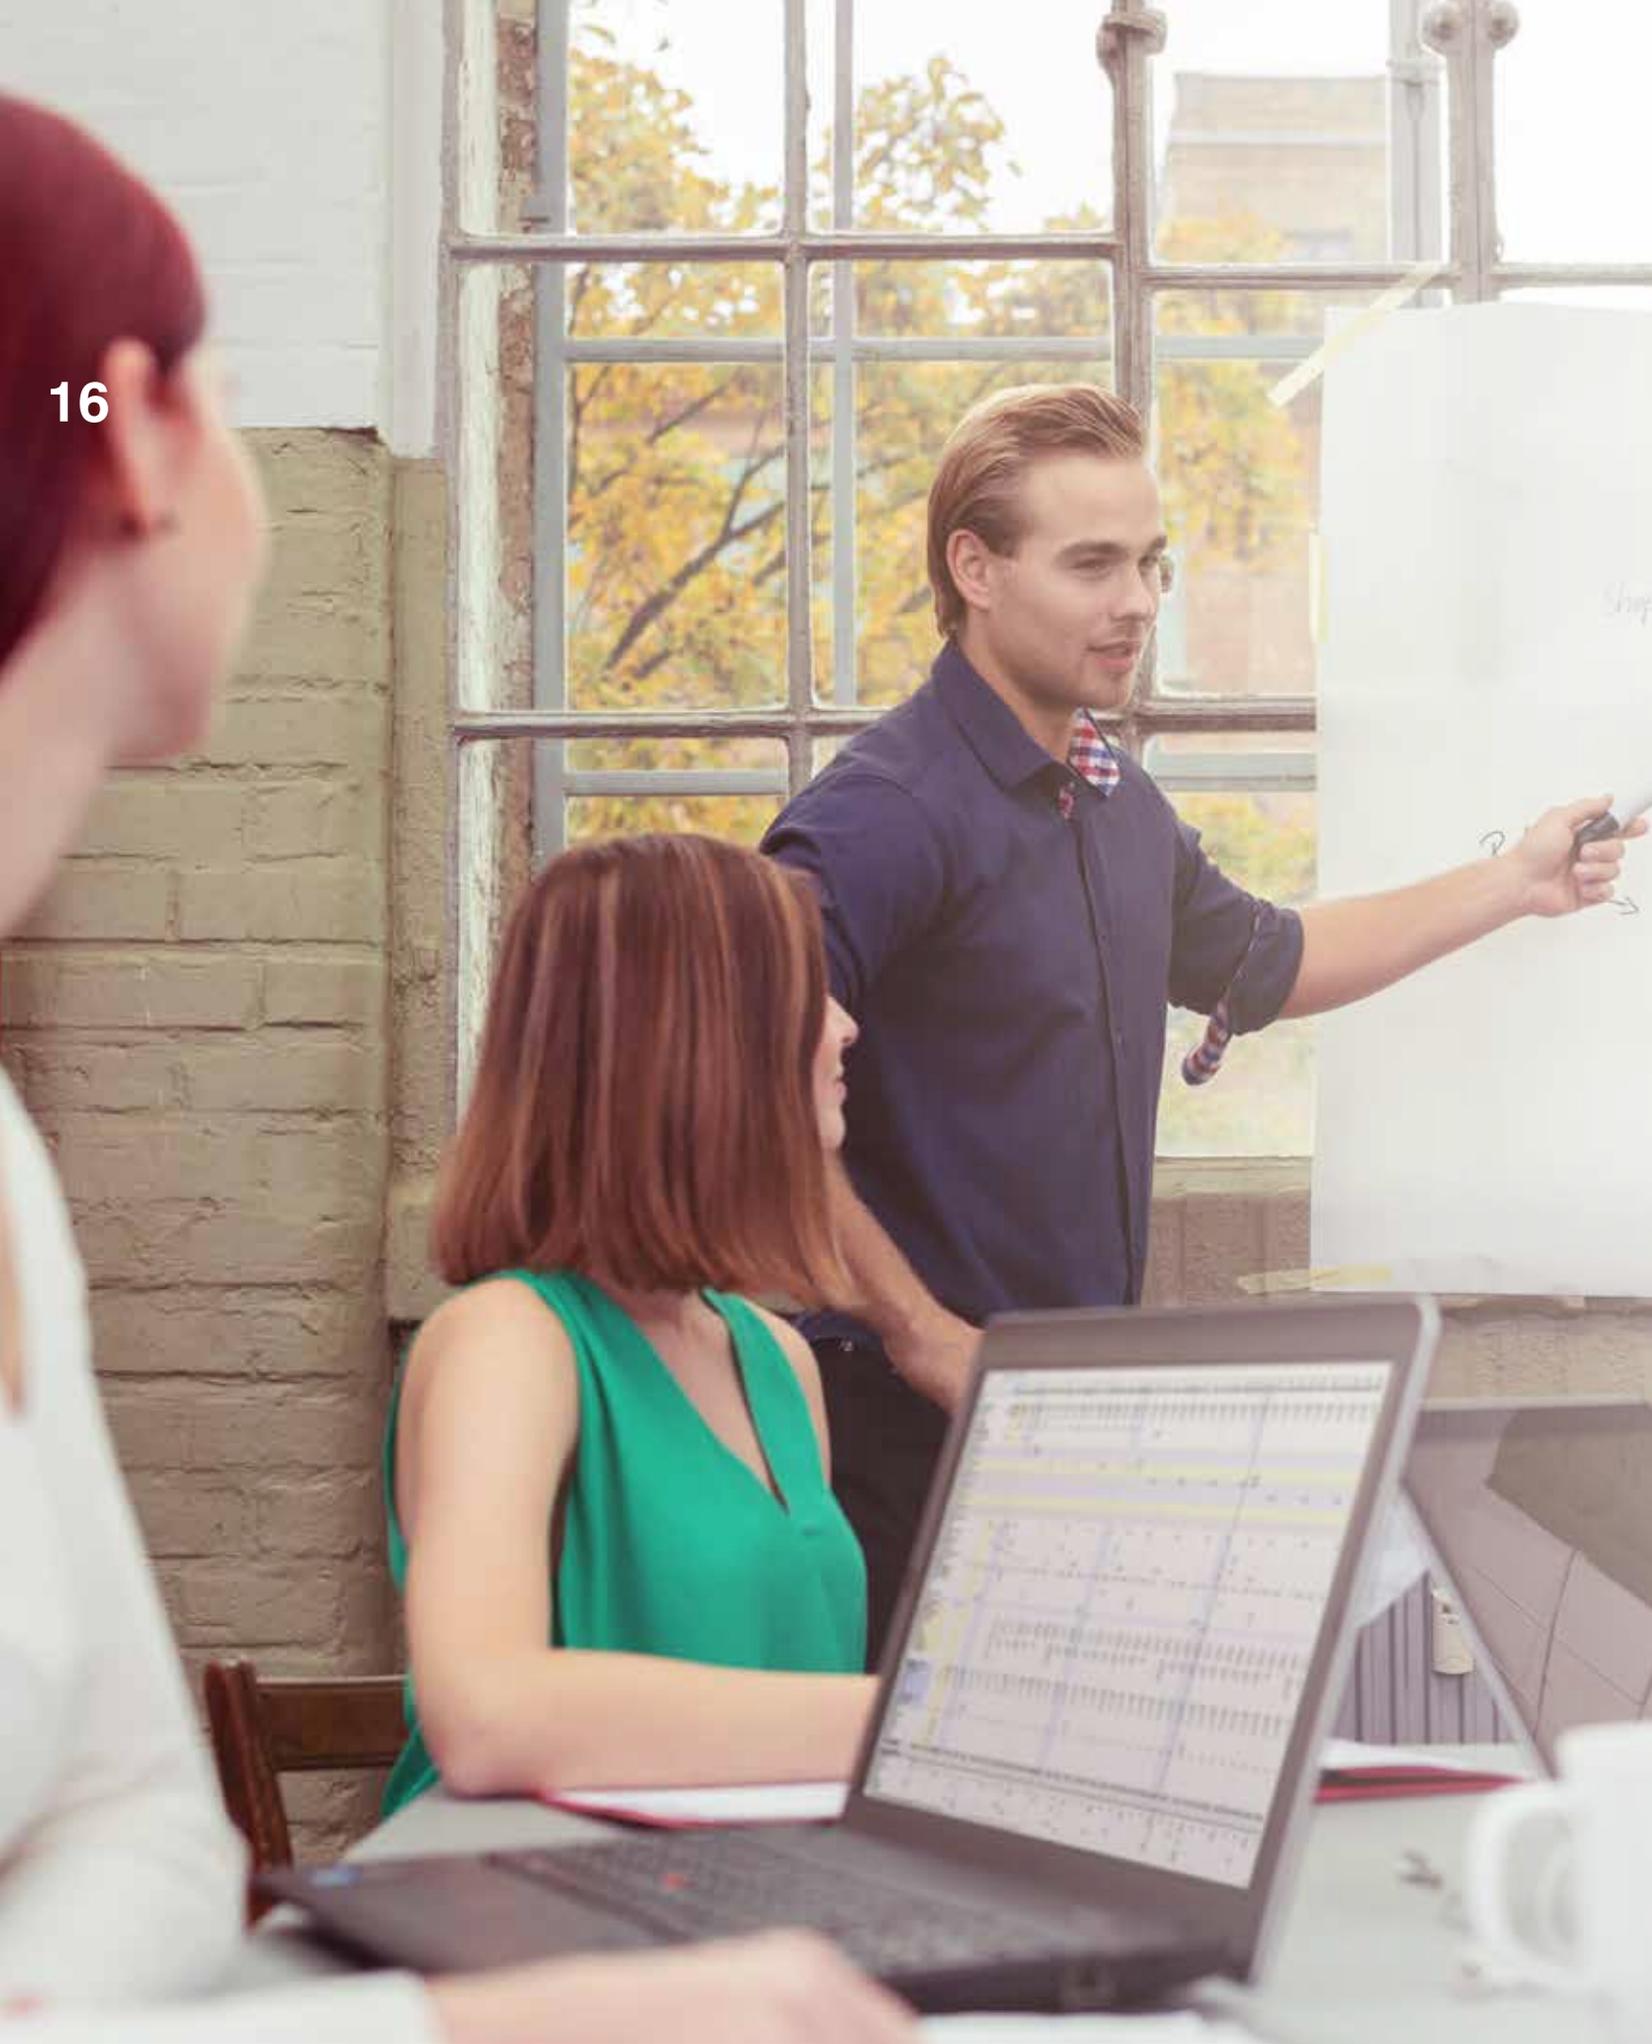

Moreover, a specific department is dedicated to the creation of all support technical and trading documents, such as manuals, leaflets, websites and advertising material.

A qualified and constantly updated

Help Desk (based on modern VoIP technologies) is always on your side for any technical question.

Finally, users may access a portal where they can find all product documents and receive regular updates on our news and products.

EL.MO. ACADEMY. ONGOING TRAINING MEANS PROFESSIONAL GROWTH OPPORTUNITIES.

EL.MO. has always thought the professional training as a fundamental element of its customer service.

We schedule technical training courses customized for our customers, to supply all tools and information to install, manage, and maintain our security systems.

All the courses are held by EL.MO. highly specialized technicians who will offer our customers our advanced know how and field expertise.

OUR PRODUCTS. A CONSTANTLY INNOVATED AND ENLARGED LINE, WHICH GUARANTEES BETTER AND BETTER PERFORMANCES.

The broad line offered includes system components, which may be integrated, for intrusion and fire prevention, video surveillance and access control.

More systems means more security and more security means more serenity.

This is not all: thanks to powerful supervision software from one single PC workstation, you can verify on your smartphone or tablet your systems' status and interact with them. Everything in the spirit of ease of use to offer an unrivalled user experience.

INTRUSION PREVENTION. WE DESIGN, PRODUCE AND DISTRIBUTE COMPONENTS, SYSTEMS AND SOLUTIONS FOR INTRUSION PREVENTION, HARD-WIRED AND RADIO, FOR HOME, INDUSTRIAL AND BUSINESS USE.

The broad line of intrusion prevention products is marked by extreme use flexibility and the ability to adapt to the installation features required.

It includes anti-theft units for small, medium and large solutions, a full

range of sensors for peripheral protection, keyboards, alarms, software and accessories. Each installation environment finds a fitting solution in our products, maximizing the performance/investment ratio.

FIRE PREVENTION. WE PRODUCE AND DISTRIBUTE DEVICES FOR ANALOG ADDRESSABLE AND CONVENTIONAL SYSTEMS, CERTIFIED ACCORDING TO CURRENT REGULATIONS.

In full compliance with the regulations in force, EL.MO. can supply a complete line of detectors and accessories to match analog addressable and/or conventional fire units and fire extinguishing units.

We also offer conventional and analog gas detector systems, both for home and industrial use.

👁️ VIDEO SURVEILLANCE. OUR CCTV SOLUTIONS HAVE BEEN CREATED BY APPLYING CUTTING- EDGE TECHNOLOGIES AND COMMUNICATION PLATFORMS.

The increasing demand for video surveillance systems in the public and private sector finds in EL.MO. an excellent technological offer with innovative systems with recording, control and broadcasting of images, carried out through state-of-the-art communication platforms.

EL.MO. offers top-notch advanced products in IP, AHD and analog video surveillance, perfect for the creation of any type of system.

Furthermore, with our own brand "e-Vision" we offer video devices, built according to own specs and for leading professional performance.

↔ ACCESS CONTROL. RESTRICTED AREAS SECURITY AND IDENTIFICATION SYSTEMS IN THE MOST COMMON STANDARDS, CONTACTLESS AND BIOMETRIC.

The broad range of products we offer enables us to create systems for access control and time management.

We present solutions aimed at the need of identifying people to control access to restricted areas.

Product lines

 **E-CONNECT.**

SECURITY FOR YOUR HOME OR BUSINESS, ANYTIME AND ANYWHERE. MANAGE YOUR INTRUSION PROTECTION AND VIDEO SURVEILLANCE SYSTEMS WITH EASE.

e-Connect is the new platform of centralization, management and supervision of EL.MO. intrusion protection and video surveillance systems. With e-Connect you may control the system status, receive notifications and turn on/off alarm systems directly from your smartphone, tablet or PC. Ease of use is crucial, as the system is conceived and built so that both professional users, e.g. installers and distributors, and end users may handle it.

Visit e-connect.elmospa.com for more information.

- Control your anti-theft system directly from the map
- Receive real-time notifications for each event
- Control your home's lighting, irrigation and heating systems
- With the e-Connect app you may see your video surveillance system's cameras directly on your smartphone or tablet.
