HANWHA TECHWIN EUROPE

A global leader of video surveillance products bringing the latest technology to the security industry. The innovative product ranges offer you choice to find the best solution for you.

Hanwha Techwin Europe Ltd. hanwha-security.eu

HanwhaTechwinEurope @hanwha-security.eu

Open Platform

Hanwha Techwin WiseNetIII cameras now support Open Platform edge-based technology. Open Platform allows users to download multiple third party applications direct to the camera. By integrating with application partners Hanwha Techwin enables you to build the right solution for your needs.

Agent Vi

Open Platform

A leading global provider of Open Platform video analytics offering real-time analysis, alerts and business intelligence that increase the ROI of video surveillance. Agent Vi's patented Image Processing over IP (IPoIP) distributes tasks between the cameras and servers to capitalise edge-based analytics and server-based central management, minimising the bandwidth required.

AiTech

Open Platform

A European software company that develops cutting edge video and audio analytics for retail and security vertical markets. Solutions include intrusion detection, perimeter protection, abandoned/ removed object and suspicious behaviour. Common users include critical infrastructure, transport, retail and other commercial markets.

Arteco

Open Platform

A market innovator in Video Event Management Software (VEMS), Arteco is providing an ALPR application to read license plates for control access purposes. License plate recognition could be used to allow access for white listed vehicles or automate alerts for black listed vehicles.

Facit Data

Open Platform

Facit Data Systems is an international software development and integration company that specialises in the design and application of retail video analytics systems. Solutions are scalable and work with all sizes of retail video surveillance network. Facit systems use a highly advanced range of specially developed algorithms to give retailers the highest quality sales intelligence and are the products of choice for a growing number of major retailers. Current edge portfolio includes heat map, people counting and queue management.

Foxstream

Open Platform

A Video Content Analysis specialist, Foxstream offers premium people counting and intrusion detection analytics with real-time information, eliminating false alarms. The capability of the software platform has led to rapid success in government, transport, urban and commercial markets.

intuVision

Open Platform

An innovator in leading-edge intelligent solutions for video analytics, delivering high performance at low cost.
Solutions include wrong way, zone intrusion, speed, object taken, line crossing and activity detection

Pernixia

Open Platform

Exclusive to Hanwha Techwin Europe.
A niche provider of edge based software applications.
Applications include Healthcheck for critical infrastructure projects and Time lapse, for use in the broadcast and construction markets amongst others
Cost effective, powerful software.

TechnoAware

Open Platform

A developer of solutions for video analysis and ambient intelligence. TechnoAware provide edge-based solutions able to detect and automate alarms for intruders entering virtual areas or crossing virtual tripwires. TechnoAware supports businesses in optimising their internal security.

Veracity

Open Platform

A revolutionary platform provider eliminating the need for VMS servers. Veracity's storage solution enables direct recording to the COLDSTORE surveillance storage. An efficient solution shown to lower failure rates, power requirements and cost, with network failover recording.
