

EASTHOUSE EUROPE INTRODUCES INNOVATIVE SAFE LOCK SOLUTIONS AT ESSEN SECURITY SHOW

SEPTEMBER 12, 2022, ESSEN, GERMANY – Easthouse Electronics Technology B.V. a Netherlands-based high security solutions provider today announced the lineup of its products that will be on display at the 2022 Security Essen Expo on September 20-23 2022. Easthouse has been highly regarded in the European market since 2015. With new certifications by VdS, SBSC and A2P*, in accordance with EN1300 class B and UL listed, the company is eager to share its collection of products.

One of the innovative solutions on display at the exhibition is the **SafeLogic Stealth** - a unique entrypad with touch screen, silent mode and randomized number display. The **SafeLogic S Series**, designed for low profile safe lock applications; and the **SafeLogic BackLit Entry Pad** with backlighting, making access easy in dimly lit areas, will also be present.

Easthouse will have its new **ProLogic WebLink** on display. This innovation is a network connected safe lock solution allowing for remote programming and management which allows users to program security functions, add/delete user access, view real-time lock status and history, all from the web-enabled software system. ProLogic WebLink offers flexibility in connectivity: Hard-wired Ethernet connection or wireless connectivity.

Easthouse has brought out the best of its line and continues to innovate, launching a series of smart security products for the connected home. The center of our system is a smart hub. The smart hub is connected to the internet and allows communication to all devices through our smartphone app.

Easthouse smart door locks gives the user the ability to manage and control front door security with features such as remote unlocking and delivering one time code access for guests, adding users remotely, alerts and notifications of the lock status and activity all from within one smartphone app. Rounding out their security ecosystem, Easthouse offers **smart window and door sensors** to monitor perimeter security, **smart motion detectors**, and **smart light switches**.

Easthouse provides high security solutions for a wide range of institutions, including banks, vaults, and commercial chain stores. They continue to meet and exceed the security requirements of certification agencies worldwide providing real security and smart home solutions for the home.

The company invites the Essen attendees to meet the European and International team at Easthouse booth in the exhibition hall at Messe Essen in Germany. Easthouse will be in **Hall 6, Booth 6B21**.

About Easthouse Europe

The Easthouse European sales office in The Hague has been providing European-wide sales support since 2015. Besides product information, advice and service, the company distributes VdS, SBSC and A2P certified electronic safe locks that supply non-bulk quantities to the European market within a short period of time to meet and exceed customer's expectations. Our Headquarters and manufacturing site are located in Nanjing, China. SECURAM Systems, Inc. headquartered in California, USA is the global marketing and sales branch. Joined with Easthouse Electronics Technology B.V. in The Hague, the Netherlands, we are proud to be a true global player within the security industry.
