

CORPORATE BROCHURE

OUR COMPANY

OUR HISTORY

Therminon was founded in 1984. In the year 1999 there was a takeover by the current owner. Therminon quickly grew from a local supplier to a common name in the Dutch technical market. We have started with installers but within a few years also wholesalers found Therminon as their reliable partner for their underfloor heating systems. In 2009 we started with the production of our own composite manifolds. This unique range of products made a further growth possible which led to the move to our new building. This building with all its facilities forms a good foundation for our company. Therminon is in all aspects ready for the future. We are not afraid to take on any challenge.

OUR MISSION

Therminon has a clear mission. Together we pursue an important motto:

“No nonsense and a pragmatic way of thinking and handling”

In our company we all stand for quality, knowledge and service. Every aspect has to be perfect for a good relationship with our customer. Where everybody stops we will go further. Working out a solution with our customer is one of our challenges. We want to make sure that when a customer makes a choice for Therminon, he makes a choice for life.

WHY THERMINON

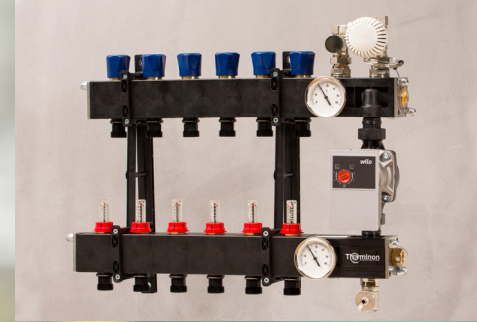

OEM SOLUTIONS

Therminon offers a complete OEM solution for the underfloor heating manifolds. We can customize our manifolds to your technical wishes but also according your corporate identity. Even boxlabels and manuals can be customized to your wishes. In this way you can offer a product which fits perfectly in your existing productline.

SYSTEM SUPPLIER

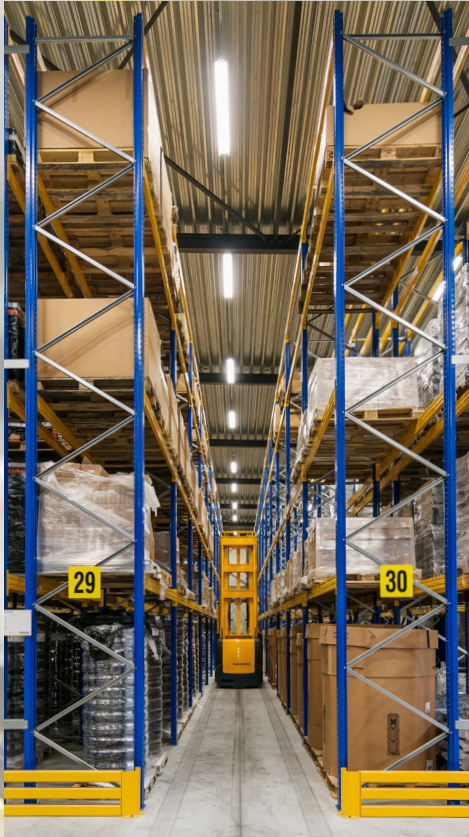

This means that we can supply your complete installation. From the insulation on the floor to the thermostats on the wall. With Therminon, customers have a 'one stop shop' for all their underfloor heating components. We are distinctive in terms of stock and a minimum delivery time. This comes together of course with a technical advise from one of our colleagues.

COMPOSITE IS THE FUTURE

With our composite manifolds we are ready for the future. This modular system is suitable for heating and cooling purposes. With composite we can build every solution a customer could wish, with or without pump. This durable range of products is applicable to the highest quality demands. Feel free to ask about the different models and solutions Therminon has to offer you.

YOUR PARTNER

OUR BUILDING

We are looking forward to welcome you in our modern new building. Our area includes; 10.000m² warehouse, 3.000m² production facilities and 1.800m² office and training space. In this location we can invite you to learn more about our latest products and improvements. A big automatic warehouse makes it possible to deliver almost everything out of stock.
