ALEIA
ROSES

Aleia Roses

Aleia Roses is the only Spanish grower of Red Naomi!® roses. The production is nearly 100% biologic and sustainable cultivation methods are used, like Integrated Pest Management (IPM). Sustainability and innovation are two important pillars of Aleia Roses: conscient use of the available resources in combination with state-of-the-art Dutch technology. Both contribute to the high quality of the rose.

In 2016 the first roses were planted and in 2017, 28 million stems were sold; the aim is an annual production of 40 million roses.

The Aleia rose

- PETALS** More than 80
- BUDHEIGHT MINIMAL** 5 cm
- OPENING** 3-3
- VASELIFE** 15 days*
- STRUCTURE** Velvet
- STEM** 60, 70, 80 and 90 cm
- COLOR** Intense red

The greenhouse

We grow the popular red roses in an ultramodern greenhouse which measures almost **15 hectares**, in the province of Soria in the north of Spain. The local climate has a favorable influence on the production process. By using natural resources such as rainwater, natural light, and heat, the impact on the environment is reduced.
