LABORATORY - RESEARCH & ADVICE

» Discover it on [www.agrocontrol.nl](http://www.agrocontrol.nl)

Groen Agro control is an innovative laboratory that optimizes production and quality in Horticulture, Produce, Food processing and Biotechnology.

## GROEN AGRO CONTROL, YOUR PARTNER IN THE SECTOR

We provide a one-stop-shop with a complete range of services dedicated to the entire fruit and vegetable chain. Our laboratory is located in the centre of Dutch horticulture and situated nearby the harbours of Rotterdam, Vlissingen and Antwerp and Amsterdam Airport.

### QUALITY AND RELIABILITY

The quality of the Groen Agro Control service is guaranteed by:

- ISO 17025-accreditation
- National reference laboratory for pesticide analysis
- QS-certification
- BNN-certification
- BioKAP-certification
- RHP-certification
- Accredited sampling

### FOOD SAFETY

We offer an extensive GC-MS and LC-MS/MS screening package of over 650 pesticide residues. The analysis results are assessed on the basis of their legal MRL and additional retail requirements. This allows you to proof the quality of your products and to demonstrate compliance with legislation and regulations.

In addition to our chemical analyses we offer a broad range of microbiological analyses, such as pathogenic bacteria (*Salmonella* spp, *Listeria monocytogenes*, STEC) or spoilage (aerobic plate count, yeast, moulds, lactic acid bacteria or Alicyclobacilli)

### NUTRITION VALUE

We offer a broad spectrum of nutrition analyses. In addition to the well-known big8 analysis we can also measure specific natural ingredients in food (products)

### DIAGNOSIS OF DISEASES

In the event of infected crops, an accurate diagnosis of the infection is of critical importance. At Groen Agro Control a team of experts use microscopic examination and if needed followed by DNA-analysis to identify diseases and to limit damage to crops. Additionally, when product damage occurs after harvest we also determine product pathogens.

### OPTIMAL PRODUCTION AND QUALITY

We offer dedicated fertilizer analyses for different growing media and provide customized advice for optimum growth and production of the crop. The intrinsic quality of the final product is made visible by the determination of nutrient content and health-promoting substances.

## RESEARCH AND ADVICE

Our independent experts are involved in research on crop management, food and food processing and the chemistry and microbiology of new products and processes. This research is conducted at our own laboratory and greenhouse facilities and also at field locations. The services of Groen Agro Control bring your business to the next level:

All purpose research package • Independent consultancy tailored to your business  
Reducing risks and hygiene protocols • Supporting your innovations
