

Meer Plant BV

More Plant is a young nursery that stands out with high-quality, healthy and new plant selections.

Rosa Hedge-On®

Under the Hedge-On® brand, ready-made pre-shaped hedge plants are offered in two new rose selections, one with white and one with pink flowers. These completely new crossings are very healthy and suitable to use as an instant hedge.

Naturosa®

Naturosa® represents a selection of new, healthy, richly flowering roses. They have been extensively tested and have received awards at several international rose competitions. They are ideal in planting in combination with perennials and are very easy to care for. Naturosa® roses fit very well into the contemporary garden concept.

Ceci n'est pas une Rose®

This is a variety of unique rose plants, whose miniature flowers don't have the traditional appearance of roses at all! They have been carefully chosen for both disease and climate resistance, floridity, user-friendliness and colour brilliance.

They are all on their own roots and fit perfectly at the front of perennial borders, flower beds, acting as ideal groundcover material. Like Naturosa, this is also a perfect fit for contemporary garden design.
