

Welcome to the tropical plants nursery of VDA-plant. For more than 40 years we grow tropical pot plants, Which we sell worldwide. Our plants begin their life on our own farm in Costa Rica, named EL Futuro and partner-nurseries in Central America.

We not only take good care for our plants, but also for the environment. Our products are partly cultivated in the country of origin where the Sun's gives the free energy. In addition, we are the first nursery that trade Fair Trade plants.
