WATER WITH A DIFFERENCE

About WaterWick

HAPPY PLANTS FOR EVERYONE!

Everybody loves plants. The freshness, health and life radiates from plants in offices, hotels and living rooms. To make everybody successful with this beautiful product from nature, we developed 'WaterWick'.

WaterWick is a simple solution for many different house and vegetable plants, especially if you tend to forget to water them. Our specially designed WaterWick concepts help give plants just the amount of moisture they need; all you have to do is keep the reservoir filled with water so the system doesn't run out. Discover all our waterwick solutions and get inspired!

WATERWICK

WATER

HAPPY PLANTS!

HAPPY PLANT ZONE

WaterWick™ is a special rope, similar to what our grandmothers used to apply. WaterWick drains water from a reservoir and supplies the water as the plant requests. Your plant drinks when it needs and how much it needs. No overwatering. No underwatering. The result: your plants stay well balanced in their 'Happy plant zone' all the time.

Happy plant zone
